

Specialist Programs

Visual art: Students will design and create mosaic pavers for our garden. They will be introduced to the historic, recent and cultural significance of mosaic art.

Physical Education: Students will be given the opportunity to develop physical stamina after the long period of remote learning!

Music: Students will play music in harmonising parts. Using Marimbas, students will combine Bass, Ostinato patterns and melody. Students will have the opportunity to improvise within this framework.

Important Dates this Term

Please use the St Joseph's Primary School App to keep track of news and important dates throughout the term.

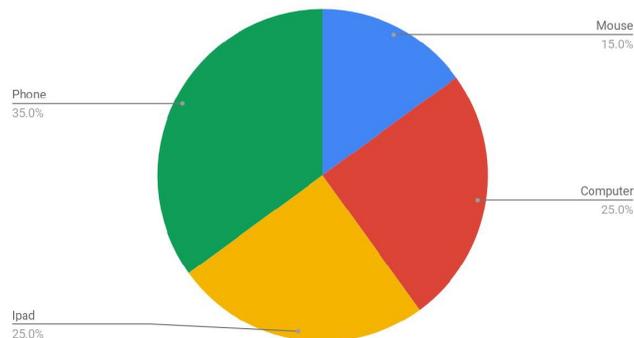

Parents will also be notified of important dates via email or text.

This will allow the School to remain flexible and respond to changes as they arise.

Thank you for adapting with us!

Xavier

Term 4, 2020

Heartfelt thanks to students and families for their efforts in Term 3.

In Term 4, we will be studying chemical science, coding and health. As usual, we will also study English, Maths, Religious Education, Physical Education, Art, Music, and the development of personal and social capabilities through the 5Cs. There is a great variety of learning for all!

The 5Cs

Helping students to develop characteristics to succeed.

Calm, Confident, Creative, Curious & Caring.

Religious Education

This term, students will explore

- The concept of the Kingdom of God
- How Jesus' mission relates to the Kingdom of God
- Why St Paul is important to the Catholic tradition, and
- The Nativity

Aboriginal Children's Day

Class programs

English

- Script writing
- Formal debates
- Scientific writing

Maths

- Algebra
- Place value and number patterns
- Mathematical problem solving

Chemical Science

- How do solids, liquids and gases behave?
- What general conditions commonly change the state of matter?
- Exploration of reversible and irreversible changes to matter

Personal & Social Capabilities

- Personal strengths
- Team work
- Working independently

Health

- Puberty
- Identity
- Impacts of emotions

Homework

Homework has no significant positive impact on learning in primary school. However, free self-directed out-door play

- Improves physical and mental health
- Increases creativity, focus and self-control, and
- Supports the development of observational and problem-solving skills

We therefore

- limit homework to daily reading and occasionally Maths games or the completion of unfinished work, and
- encourage out-door self-directed play.

Writers' Corner — Creative expressions

In a cave there lived a carefree, cold moose named Casper Sparrow. Not a pretty pointy, windy cave, filled with bacon and a chubby smell, nor yet a handsome, hairy, tall cave with nothing in it to sit down on or to eat - it was a moose-cave, and that means warmth.

By Ashley

In my experience, summer is the busiest time for park rangers and other outdoor work. I would like to work as a park ranger because I would love to protect native plants and animals and to see beautiful sites around the area. One other type of work is to trace and collect evidence of the existence of endangered species. I would enjoy running tour guides because I would like to meet new people and share my knowledge about the land and culture.
